

LIFEPAK® 15 MONITOR/DEFIBRILLATOR

Thank you for purchasing the LIFEPAK 15 monitor/defibrillator. You have joined the lifesaving team of those around the world who are committed to meeting diverse monitoring and defibrillation needs. This guide provides the information you need to get started.

IMPORTANT FIRST STEPS

Locate the packing list, which can be found on the outside of the shipping carton.

Remove the contents from the box. Check for signs of damage that may have occurred during shipping. Please note: Your order may be shipped in more than one shipping carton.

Check the contents of the box against the packing list to ensure that all contents are accounted for.

U.S. customers need to register the device if it will be located somewhere other than the shipping address. Please do one of the following: register the device at www.physio-control.com, call the device tracking hotline at 1.800.426.4448, or use one of the postage-paid device tracking cards located in the back of the Operating Instructions.

Set up the battery charger and charge the batteries in preparation for use. Please note: LIFEPAK 15 monitor/defibrillator batteries are specific to the 15.

SET UP YOUR DEVICE

The 15 is shipped with factory default settings. These defaults are based on the settings that are most commonly used by emergency care providers. Settings can be changed to meet your organization's protocols. For more information on changing the setup options, see the *LIFEPAK 15 Monitor/Defibrillator Setup Options*.

LEARN TO USE THE LIFEPAK 15 MONITOR/DEFIBRILLATOR

The 15 has many important features that when used correctly, can help provide lifesaving care. The inservice DVD provides an excellent overview of the product and its features. We recommend starting there. Then, for more detailed, step-by-step instructions, see the *LIFEPAK 15 Monitor/Defibrillator Operating Instructions*. This manual provides complete instructions on the correct use of the device and all therapies, including indications, warnings and precautions.

ACCESSORIES

A comprehensive list of accessories that are approved for use with the 15 is available. Many accessories have been developed specifically for use with the 15, such as the therapy cable and batteries*. For a complete list of approved accessories, contact your local Physio-Control sales consultant.

*Please note: accessories from other manufacturers and other LIFEPAK devices may not be compatible with the 15. Use only the approved accessories for your device.
